

SCHOOL Server Room Monitoring System

INTRODUCTION

Schools and Institutions of the like need to safeguard both employee and student private data, track records, and other crucial information necessary for its business operation. If not monitored properly, the Institution might face risk of data and financial loss which could negatively affect their credibility and reputation. However, with a reliable monitoring system these kinds of scenarios can be prevented.

Picobox is the right solution, a smart monitoring controller designed to monitor server rooms and able to send an alert via SMS and Email notification 24/7, anytime and anywhere.
